CHS Test Store: How It Works and Test Guide

For all testers. Date: 17 Oct 2026. Use together with "CHS Test Store: Logins".

1. What this test store is

A pretend building-materials-to-interior market inside the real CHS Marketplace: 8 test sellers in Kaduna, Kano, Abuja and Lagos selling 75 items, from cement and blocks (foundation) to curtains and cookware (finishing). Buyers have N5,000,000 of test money. Everything works exactly like the live marketplace, so what you find here is what real customers would find.

2. One-time set-up for each tester

a) Log in with your assigned account (see the Logins PDF). b) Open Marketplace. c) Tap the "Deliver to" box and choose **State, then LGA, then Area**. Use Kaduna / Kaduna North / Kawo for the standard test. Try other places later (for example Kano or Lagos) to see delivery change. d) Read the search-guide that flashes the first time: **Near me** (close sellers, cheapest and fastest delivery), **Cheapest overall** (price plus delivery), **Anywhere** (whole country).

3. The big shopping list (20 items, 8 sellers, one checkout)

#	Item	Qty	Unit price (N)	Seller
1	Dangote Cement 50kg bag	20	9,500	Kaduna Cement
2	9-inch Sandcrete Hollow Block	200	450	Kaduna Cement
3	Iron Rod 16mm	10	14,500	Kaduna Cement
4	Aluminium Roofing Sheet 3m	30	14,500	Kaduna Roofing
5	Timber Plank 2x4 (12ft)	20	3,800	Kaduna Roofing
6	Emulsion Paint 20L (pick colour)	4	38,000	Kano Paints
7	Porcelain Floor Tiles 60x60 carton	10	14,500	Kano Paints
8	Hardwood Panel Door	3	45,000	Kano Paints
9	Electrical Cable 2.5mm 100m	2	38,000	Abuja Electrical
10	Distribution Board 12-way	1	28,000	Abuja Electrical
11	LED Bulb 12W pack of 10	2	12,000	Abuja Electrical
12	Water Closet (toilet set)	1	85,000	Abuja Electrical
13	Water Tank 1000L	1	78,000	Abuja Electrical
14	3-Seater Sofa	1	280,000	Lagos Furniture
15	Queen Bed Frame	1	150,000	Lagos Furniture
16	1.5HP Split AC	1	380,000	Abuja Home Equipment
17	Ceiling Fan 56-inch	3	28,000	Abuja Home Equipment
18	Non-stick Cookware Set	1	48,000	Kaduna Kitchen
19	Orthopaedic Mattress 6x6	1	185,000	Kano Bedding
20	Living Room Curtains (pair)	1	45,000	Kano Bedding
	Goods total (before delivery and CHS fee)		**2,831,000**	

Steps: search each item, open it, choose the quantity (and colour for paint), then **Add to cart**. Items from different sellers sit in one cart, grouped by seller. Search tip: try the scope modes and compare the "Total with delivery" shown on each card. Tested result for this exact list to Kaduna North: goods N2,831,000 + 6% CHS fee = N3,000,860, plus delivery N96,735, total N3,097,595.

4. Cart, delivery and payment

1) Open the cart. Each seller group shows its delivery choices: free delivery by the seller (only Kaduna sellers, same city), CHS city delivery, intercity courier, or pick-up at a CHS centre (OFF until admin switches a centre on). 2) Check the delivery total, the CHS fee and the grand total. 3) Choose the delivery address text. 4) Tap Pay. A **ConfirmPay** screen shows the amount; money does not move until you confirm and enter your payment PIN. 5) Result: one order per item (CHS-BUY-number) and one parcel per seller (SHP-number). All money sits in CHS escrow. Nobody is paid yet.

5. Buyer follow-up: Marketplace > My deliveries

Each parcel shows a progress bar, history, and a **6-digit delivery code** that only you can see. Give the code to the rider only when you hold the goods. When the goods arrive tap **I have received it** (two taps) or **Report a problem** (this puts the money on hold and alerts admin). If nobody confirms, a daily job confirms a parcel the carrier marked delivered after 3 days.

6. Seller duties: Vendor page > Deliveries tab

Log in as the seller. You see the parcels to hand over. Press **I have handed it over**, add carrier and waybill number. For free local delivery by the seller, the seller types the buyer's 6-digit code to confirm delivery. Sellers can also edit their city, area, free local delivery and pickup address.

7. Admin duties: Admin > Oversight > Deliveries

Queue with filters (in progress, problems, delivered). For each parcel the admin updates status (dispatched, at origin centre, in transit, at destination centre, out for delivery, delivered), carrier, waybill and note; every step is recorded with who and when. Money: **Release N% to seller** (default 60%, editable, two taps; allowed before delivery) and **Release balance** (only after delivery). A refund is refused once a part was released. Also here: delivery rates, rules, CHS centres (OFF until a street address is added) and the Area map points editor.

8. Full end-to-end test script

Step	Who	Action	Expected result
1	Buyer One	Choose Kaduna North / Kawo, add the 20 items, pay	8 parcels, total N3,097,595, wallet drops from N5,000,000 to N1,902,405
2	Buyer One	My deliveries	8 parcels, each with its own code and expected dates
3	Seller 08071000001	Deliveries tab, hand over, then enter buyer code (free local)	Parcel shows delivered
4	Admin	Deliveries queue; set a courier parcel to dispatched, in transit, delivered	Timeline shows each step with time
5	Admin	Release 60% on one order, then try release balance before delivery	60% goes to seller wallet; balance refused until delivered
6	Buyer One	Tap "I have received it" on a delivered parcel	Order completes; admin can release the rest
7	Buyer One	Report a problem on another parcel	Money held; admin alert
8	Admin	Try a refund after a part release	Refused with a clear reason
9	Buyer Two	Switch Deliver to: Kano; compare Near me, Cheapest, Anywhere	Different sellers and totals; warning if delivery over 25% of price
10	Admin	Edit a rate band; add a CHS centre with street address	New prices and pick-up option appear

9. What to record

For every problem write: your name, phone number used, the screen, what you tapped, what you expected, what happened, and a screenshot. Send to the CHS team. Include the phone model and browser.

10. Using it on an iPhone

The app is the same web app on iPhone and Android. Open the link in Safari, tap Share > Add to Home Screen. We added iPhone-specific safety rules (text boxes no longer make Safari zoom in; the bottom bar and top clock area keep clear of the home bar and notch). We could not run a real iPhone here, so please test on at least two iPhones (one small like an SE, one large) and report anything that looks different. Fonts, colours and layout widths come from the same code, so they should match; the likely differences are only keyboard behaviour and spacing near screen edges.

11. Honest limits

Couriers are not connected by software; admin types carrier and tracking. Returns after delivery are not built. CHS centres are OFF until real addresses are added. All data here is test data and may be reset.
