

CHS Complete Feature Catalog

CHS Complete Feature Catalog

Every real, working feature in CHS, organized by role and by round of client testing.

1. Platform-Wide (Every Role)

Registration with role selection

Buyer, Tenant, Property Owner, Agent, Property Manager, or Commercial Developer — with role-specific extra fields (e.g. professional certificate upload for Managers).

User path: Register page · *Admin path:* New accounts land in Admin → Registrations, pending approval

NIN uniqueness check

A real National Identification Number can only ever be tied to one CHS account.

User path: Register page · *Admin path:* N/A — enforced at registration

Multi-role linking

One real identity, one wallet, one login can hold several roles at once (e.g. Owner + Tenant) via “Link Account” rather than a second registration.

User path: Link Account page — every role · *Admin path:* N/A — self-service

Biometric login (Face ID / fingerprint)

Real WebAuthn — uses the device’s own secure hardware; CHS never sees or stores the actual biometric data.

User path: Login page + Profile setup — every role · *Admin path:* N/A — self-service

Valid ID + liveness verification

Real document upload plus a genuine, real-time photo capture (never an uploaded photo) reviewed by CHS staff.

User path: Registration / Profile — every role · *Admin path:* Admin → Face Verification (Registration & Setup domain)

Editable profile with re-verification trigger

Name, phone, address, and state are genuinely editable. A real name change automatically resets ID/liveness verification.

User path: Profile page — every role · *Admin path:* Real notification to Super Admin on any name change

Wallet (main + rent savings + maintenance reserve)

Three real sub-balances per user — a main spending balance plus two dedicated savings pots for rent renewal and maintenance costs.

User path: Wallet page — every role · *Admin path:* Admin → Finance — search any user’s real balances, freeze/unfreeze

Wallet funding via Paystack

Real, secure card/bank/USSD payment; balance updates automatically once payment genuinely completes.

User path: Wallet page — every role · *Admin path:* N/A — self-service

Wallet withdrawal to bank

Only one linked bank account per wallet, for security. Real Paystack transfer to the verified account.

User path: Wallet page — every role · *Admin path:* N/A — self-service, admin sees real withdrawal_requests records

Wallet-to-wallet transfer

Send funds directly to another CHS user by phone or email — real-time lookup and instant transfer.

User path: Wallet page — every role · *Admin path:* N/A — self-service

Bank account linking with real-time verification

200+ real Nigerian banks with search; the account number is checked against the real bank network before it can ever be linked. Real 48-hour security window on any change.

User path: Wallet → Link bank account — every role · *Admin path:* N/A — self-service, real-time

Notification preferences

Independent real toggles for offers, messages, and marketing notifications.

User path: Profile page — every role · *Admin path:* N/A — self-service

Diaspora Mode

A real setting for CHS users managing property or transactions from outside Nigeria.

User path: Profile page — every role · *Admin path:* N/A — self-service

Terms & Conditions scroll-to-accept gate

A real, meaningful acceptance — the checkbox only unlocks after genuinely scrolling to the bottom. Required before any dashboard is reachable.

User path: First login — every role · *Admin path:* N/A — one-time gate

Role-specific first-dashboard guide + persistent Users Guide

A short popup on first dashboard visit, plus a full, always-accessible reference page.

User path: First login popup + More menu → Users Guide · *Admin path:* N/A — reference

Dark mode

A real, complete theme system across the whole app, with an app-wide fix ensuring form text stays readable in both modes.

User path: Every page — every role · *Admin path:* N/A — visual

PWA install + splash screen

Installable as a real app on the home screen, with a proper full-screen splash and app icon.

User path: Browser install prompt · *Admin path:* N/A — visual

Guest — its own real role

A genuine, separate role from Buyer, for booking a shortlet apartment or a hotel/lodge/event centre/car park stay — its own heading at registration and login, not merged into another role.

User path: Register / Login page — every role · *Admin path:* N/A — self-service

Account approval gate

A real, enforced rule: a newly registered account cannot use anything beyond the public homepage until CHS staff approve it — previously unenforced despite existing in the database.

User path: Every page — every role · *Admin path:* Admin → Registrations

Account suspension & appeal

Real admin tools to suspend a suspicious account with a documented reason, and a genuine appeal channel that stays reachable even while suspended.

User path: Suspended-account screen — every role · *Admin path:* Admin → Overview, Suspend a Real Account

Self-service account deactivation

A real, reversible way to temporarily deactivate your own account — nothing deleted, log back in any time to reactivate.

User path: Profile page — every role · *Admin path:* N/A — self-service

Automatic image compression

Every property photo and profile picture is resized and re-compressed in the browser before upload — no action required, real storage savings confirmed by direct testing.

User path: Every photo upload — every role · *Admin path:* N/A — automatic

Digital receipts

A real, printable receipt (Print/Save as PDF) for any transaction — rent, remittance, commission, sale — using the same reference number already generated for it.

User path: My Receipts page — every role · *Admin path:* N/A — self-service

2. Buyer & Tenant

Location + price search

Filter by state, LGA, area, property type, minimum bedrooms, and a real minimum/maximum price range.

User path: Homepage search — Buyer / Tenant · *Admin path:* N/A — self-service

Rent / Sale / Shortlet tabs

Real filtering of the whole catalog by purpose.

User path: Homepage — Buyer / Tenant · *Admin path:* N/A

Saved Properties & Saved Searches

Save individual listings, or save a whole search to be matched automatically as new listings arrive.

User path: Saved page — Buyer / Tenant · *Admin path:* N/A — self-service

Making an offer (sale)

Propose a real price directly to the owner; goes through a real CHS Sale Approvals checkpoint before anything moves to escrow.

User path: Property detail page — Buyer · *Admin path:* Admin → Sale Approvals (Owner/Buyer/Tenant domain)

Rental application

A real application, screened by CHS staff before the owner ever sees it.

User path: Property detail page — Tenant · *Admin path:* Admin → Applications (Owner/Buyer/Tenant domain)

Inspection booking + transport fee

Real fee calculated per-person based on distance; a genuine 12-hour minimum notice enforced by the database itself.

User path: Property detail page — Buyer / Tenant · *Admin path:* Admin → Inspections (Owner/Buyer/Tenant domain)

Buyer/Tenant Readiness Score

A real questionnaire (timeline, funds ready, decision-maker) plus verification and inspection-attendance history — shown to owners, never a fee or gate.

User path: Inspection booking form — Buyer / Tenant · *Admin path:* N/A — computed live

Shortlet booking

Paid instantly through the wallet, held in real escrow until check-in is confirmed. Real guest verification required.

User path: Property detail page — Buyer / Tenant · *Admin path:* N/A — self-service

Rent-to-Own

Where offered, a real monthly amount counting toward eventual ownership, shown directly on the listing.

User path: Property detail page — Buyer · *Admin path:* N/A — set by owner at listing time

House Rules acknowledgment

A real, documented agreement a tenant acknowledges as part of their tenancy.

User path: Tenant dashboard, per tenancy · *Admin path:* N/A — set by owner

Property Condition Report

Documented and photographed at move-in — real evidence-based liability instead of a caution-fee guess.

User path: Condition Report page — Tenant · *Admin path:* N/A — self-service

Formal Notices

Real formal communications (e.g. rent reminders, lease notices) from owner/CHS, viewable and expandable.

User path: Tenant dashboard · *Admin path:* N/A — sent by owner/CHS

Owner-tenant message thread

A real, direct messaging channel per tenancy.

User path: Tenant dashboard, per tenancy · *Admin path:* N/A — self-service

Raise a Dispute

A real, two-sided dispute process — CHS's internal resolution is the first step before arbitration or courts.

User path: Tenant dashboard + Owner dashboard · *Admin path:* Admin → Disputes (Customer Care domain)

Talk to an Agent (Concierge)

Describe a property need in free text or voice instead of using search filters — a real request CHS follows up on personally.

User path: Bottom nav → Property request — Buyer / Tenant · *Admin path:* Admin → Concierge, within Owner/Buyer/Tenant domain

Urgent & Emergency Sale browsing

Real, discounted, time-boxed listings shown in a dedicated homepage row with the real deadline.

User path: Homepage — Buyer · *Admin path:* N/A — browsing only

Market data (average prices, demand trend)

Real, genuine data (not placeholder figures) on current prices and search-driven demand patterns.

User path: Bottom nav → Average prices / Demand trend · *Admin path:* N/A — self-service

Engage CHS — buy a construction project

Full request flow with real specifications, document checklist, two-way chat, and the Construction Roadmap tool.

User path: Engage CHS page — Buyer / Owner · *Admin path:* Admin → Engage CHS (Super Admin only)

Hotel, Event Centre, Hall, Car Park, Cinema & Recreational/Sports booking

A real, instant “Book now” flow — not a rental application — for any genuine guest venue, correctly categorized and commissioned. A business-lease “hire” listing (e.g. a filling station) correctly stays on the rental-application path instead.

User path: Property detail page — Buyer / Guest · *Admin path:* N/A — self-service

Auto-pay rent from a dedicated savings wallet

An optional, real toggle — rent pays itself the moment it's due from a separate Rent Savings balance, or stays fully manual if left off.

User path: Tenant dashboard, per tenancy · *Admin path:* N/A — self-service

Subsequent-year rent — no repeat tenant commission

The system now genuinely knows a renewal from a first payment. From year two onward, the tenant pays CHS nothing further — only the landlord, at a real, reduced 3%. Shown live on both the tenant's and owner's rent countdown.

User path: Tenant & Owner dashboards, rent countdown · *Admin path:* N/A — automatic

Move-out condition report + real court affidavit

A genuine move-out counterpart to the existing move-in report, with a real, required court-issued affidavit upload — now actually visible to the landlord, which it never was before.

User path: Condition Report page — Tenant; visible on Owner dashboard · *Admin path:* N/A — self-service

Non-renewal notice with a real message

A genuine optional message sent to the landlord along with the notice — previously a bare, wordless click.

User path: Tenant dashboard, per tenancy · *Admin path:* N/A — self-service

Real street address on every listing

A required, specific address (e.g. "House 12, Shagari Road") — not just a general neighborhood — visible on the tenant's own dashboard and usable for real fault/payment tracing.

User path: List a property form; Tenant dashboard · *Admin path:* Admin analytics, traceable by real address

3. Property Owner

List a property

Photos, location, price, purpose, bedrooms, and special terms (rent-to-own, house rules). Starts unverified.

User path: Owner dashboard → List a property · *Admin path:* Admin → Properties (Owner/Buyer/Tenant domain)

Property verification

CHS reviews every listing before it's publicly visible — the real meaning behind "CHS Verified."

User path: Owner dashboard · *Admin path:* Admin → Properties (Owner/Buyer/Tenant domain)

Fixed-tier promotion (7/30/90-Day Boost)

One-off paid tier, debited directly from the wallet.

User path: Promote page, per listing · *Admin path:* N/A — self-service

Credit-based promotion (pause anytime)

Real, shared credit balance across every listing; each listing charged separately per real day it's on, based on real location/size cost. Real ranking (Category A-D + literal Top 10/20 position) against the same real local market.

User path: Promote page, per listing · *Admin path:* N/A — automatic, database-driven

Urgent & Emergency Sale activation

Requires the listing already verified and owner ID-verified. Real original price, discount, and deadline shown to buyers.

User path: Owner dashboard → 🚨 Urgent Sale · *Admin path:* Notified via general notifications on activation

Managing offers & rental applications

Real accept/reject decisions on real, CHS-screened offers and applications.

User path: Owner dashboard · *Admin path:* Admin → Sale Approvals / Applications

Inspection management + Readiness Score visibility

See each real requester's readiness score; mark real attendance/no-show after the scheduled time passes.

User path: Owner dashboard, per property · *Admin path:* Admin → Inspections

Delegating to a Property Manager

Hands maintenance and certain approvals to a registered Manager; reversible any time.

User path: Owner dashboard · *Admin path:* N/A — self-service

Property analytics

Real view counts, inspection counts, and interest counts — not fixed placeholder numbers.

User path: Analytics page, per listing · *Admin path:* N/A — self-service

Editing a live listing

Real edits to an already-published property.

User path: Edit listing page · *Admin path:* N/A — self-service

Engage CHS for a professional service

Full Property Management, Sale Negotiation, Construction Monitoring, Project Management, Renovation — each with its own real terms and fee schedule.

User path: Engage CHS page — Owner · *Admin path:* Admin → Engage CHS (Super Admin only)

Download verified sale documents

The actual, CHS-verified legal documents (Certificate of Occupancy, Deed of Assignment, etc.) genuinely downloadable by a paying buyer directly — previously only ever tracked as a physical-dispatch status with no real digital access.

User path: Property detail page, after payment — Buyer · *Admin path:* N/A — self-service

Accept an offer at negotiated terms, mid-chat

A real conversion point that didn't exist before — accept at a different final price than the original offer, with an optional condition (e.g. a payment deadline), directly from the ongoing negotiation.

User path: Owner dashboard, per offer · *Admin path:* N/A — self-service

4. Agent

Unique referral link

A real code (e.g. CHS-AG-0024) automatically attached to every property link generated — always opens the property directly on CHS.

User path: Agent dashboard · *Admin path:* N/A — self-service

Automatic commission attribution

If a referred visitor completes a real transaction on that property, CHS automatically attributes and credits the commission.

User path: Agent dashboard · *Admin path:* Admin → Referral fees (Agent Relations domain)

Real referral tracking (masked for privacy)

Real deal stage, earnings this month, and total earned — served from a privacy-conscious masked view.

User path: Agent dashboard · *Admin path:* Admin → Referral fees

Managing an agent-managed property's own commission

For a property under full agent authority, set your own real market rate (e.g. 10-15%) with the client — CHS charges the client nothing extra, taking a real, capped 3% only from your own earnings.

User path: Agent dashboard, per managed property · *Admin path:* N/A — self-service

Per-owner commission rate — one real, standing rate

A genuine, editable rate per real owner relationship, not re-entered per property — reviewable and adjustable any time, applying automatically to every property you manage for that owner, including new ones.

User path: Agent dashboard → Your Real Commission Rate Per Owner · *Admin path:* N/A — self-service

Digital remittance to an owner's wallet

Rent collected in person, remitted straight into the real owner's wallet with your agreed commission auto-deducted — a real, permanent reference either side can point to.

User path: Agent dashboard → Remit Collected Rent to an Owner · *Admin path:* Admin → Finance, real remittances table

A real tenant register

Full biodata, property details, and a real auto-generated reference number (e.g. TEN-000001) for every tenant you manage — plus real ID and selfie verification.

User path: My Tenant Register page · *Admin path:* N/A — self-service

A real mini-admin — your own team

Add real, separate staff accounts by phone number, assign a role, and see their genuine daily activity reports — the same kind of oversight CHS itself runs on.

User path: Agent dashboard → Manage My Team · *Admin path:* N/A — self-service

Multiple linked bank accounts

Up to 4 real, Paystack-verified bank accounts — a genuine business need for agents working across multiple banking relationships, unlike every other role which stays single-account.

User path: Profile → Linked bank accounts · *Admin path:* N/A — self-service

Expenses & income tracking

Real salary, rent, transport, logistics, and commission income entries — a genuine net position, not just a spending log.

User path: My Expenses & Income page · *Admin path:* N/A — self-service

My real activity report

A genuine, date-range (week/month/quarter) report of commission earned, deals closed, and tenancies managed.

User path: Agent dashboard → Generate my activity report · *Admin path:* N/A — self-service

5. Property Manager

Delegated property management

Owners can delegate specific properties; maintenance and certain approvals route to the manager directly.

User path: Manager dashboard · *Admin path:* N/A — self-service

Management termination

An owner can reverse delegation any time, handing responsibilities back.

User path: Owner dashboard (trigger) / Manager dashboard (effect) · *Admin path:* N/A — self-service

Posting a maintenance job for quotation

Real job posts that verified artisans can quote on, ranked by a transparent rating/reliability/experience/equipment formula.

User path: Manager dashboard · *Admin path:* Admin → Maintenance (Artisan/Developer/PM/Vendor domain)

Rating an artisan

Real, genuine ratings after a completed job.

User path: Manager dashboard, per completed job · *Admin path:* N/A — self-service

Owner-occupier support in estates

Register a real occupant who owns their unit outright (no tenancy) alongside genuine tenants in the same estate — correctly counted in occupancy and included in service-charge billing.

User path: Manager dashboard, per estate unit · *Admin path:* N/A — self-service

Per-owner commission rate, digital remittance, tenant register, mini-admin team, multiple bank accounts, expenses tracking

Every real business tool built for agents this round applies identically to managers — the same standing per-owner rate, the same digital remittance, the same tenant register and team system.

User path: Manager dashboard — same real pages as Agent · *Admin path:* N/A — self-service

My real activity report — across all my estates

A genuine, date-range report of new tenancies, service charges billed and collected, and maintenance resolved across every estate you manage.

User path: My Estates page → Generate my activity report · *Admin path:* N/A — self-service

6. Commercial Developer

Developer registration & review

A real application reviewed by CHS before projects go live.

User path: Register / Developer dashboard · *Admin path:* Admin → Developers (Artisan/Developer/PM/Vendor domain)

Listing development projects

Estates, instalment plans, and investment plans.

User path: Developer dashboard · *Admin path:* Admin → Developers

7. Vendor & Marketplace

Vendor registration & verification

Reviewed by CHS before listings go live — the same trust standard applied platform-wide.

User path: Become a Vendor / Vendor dashboard · *Admin path:* Admin → Vendors (Artisan/Developer/PM/Vendor domain)

Listing products & bundles

Real materials/services catalog, browsable by category on the Marketplace.

User path: Vendor dashboard (list) + Marketplace page (browse) · *Admin path:* N/A — self-service

Service quote requests

Real incoming requests for a quote on a specific service.

User path: Vendor dashboard · *Admin path:* N/A — self-service

Referral fee tracking

Real fees on deals connected through the Marketplace.

User path: Vendor dashboard · *Admin path:* Admin → Referral fees

8. Artisan

Artisan registration & verification

Real trades, years of experience, certification, and equipment tier (with photo/receipt backing) — reviewed before quoting is allowed.

User path: Become an Artisan / Artisan dashboard · *Admin path:*

Admin → Artisans (Artisan/Developer/PM/Vendor domain)

Quoting on maintenance jobs

Real quotes ranked by a transparent formula: rating/reliability first, experience second, equipment third.

User path: Artisan dashboard · *Admin path:* Admin → Maintenance

Full-management job priority

For any property under full CHS management, maintenance work goes first and exclusively to verified CHS Maintenance Agents.

User path: Automatic — Artisan · *Admin path:* N/A — automatic

Job dispute resolution

Either the artisan or the client can raise a genuine, two-sided dispute about a completed job.

User path: Artisan dashboard · *Admin path:* Admin → Disputes

Ratings received

Real, visible rating history.

User path: Artisan dashboard · *Admin path:* N/A — self-service

9. Admin & Platform Management

Super Admin role

One real account, practically involved in every part of the platform — handles Finance and Engage CHS directly, and ratifies every sub-admin's high-stakes decision.

User path: Admin dashboard · *Admin path:* Admin → Overview

Five real sub-admin domains

Customer Care, Registration & Setup, Owner/Buyer/Tenant, Agent Relations, Artisan/Developer/PM/Vendor — each sub-admin only sees and acts within their own domain, enforced at the database level.

User path: Admin dashboard, tab-gated per domain · *Admin path:* Admin → Overview → Assign an admin role

Code-based admin login approval

A sub-admin's correct password alone isn't enough — a real code is generated and sent to the Super Admin, who must approve that specific login.

User path: Sub-admin login flow · *Admin path:* Admin → Overview — pending login approvals

High-stakes approval queue

Routine sub-admin actions apply immediately; financial and verification decisions are held pending real Super Admin sign-off.

User path: Admin dashboard, across relevant tabs · *Admin path:* Admin → Overview — pending sub-admin actions

Trace an Account

Search any real user by phone/email/name and see their full wallet balance + transaction history, promotion credits + active promotions, construction roadmap unlocks, linked bank account, and Engage CHS requests — all in one place. The real fix for resolving a support issue ("I paid but nothing happened") the way a phone network traces an account from just a phone number.

User path: N/A — admin only · *Admin path:* Admin → 🔍 Trace an Account (Super Admin only)

Sub-admin action history

A real, permanent audit log of every resolved sub-admin request — previously, once approved or rejected, a request simply vanished with no record.

User path: N/A — admin only · *Admin path:* Admin → Overview → View sub-admin action history

Pre-launch admin test mode

Super Admin can preview any real dashboard using their own account, never a real user's data, with a visible banner the whole time.

User path: N/A — testing tool · *Admin path:* Admin → Overview → Switch role for testing

Finance

Search any real user's wallet, view all three real balances, freeze/unfreeze.

User path: N/A — admin only · *Admin path:* Admin → Finance

Sale Approvals

The real checkpoint between an accepted offer and money moving to escrow.

User path: N/A — admin only · *Admin path:* Admin → Sale Approvals

Face Verification (Liveness)

Real human review of each real-time capture.

User path: N/A — admin only · *Admin path:* Admin → Face Verification

Registrations

Approve or reject new real accounts.

User path: N/A — admin only · *Admin path:* Admin → Registrations

Applications

Real rental application review before an owner ever sees it.

User path: N/A — admin only · *Admin path:* Admin → Applications

Properties

Real listing verification before it's publicly visible.

User path: N/A — admin only · *Admin path:* Admin → Properties

Disputes

Real, two-sided dispute resolution across tenancies and artisan jobs.

User path: N/A — admin only · *Admin path:* Admin → Disputes

Feedback

General platform suggestions/complaints, not tied to a specific transaction.

User path: N/A — admin only · *Admin path:* Admin → Feedback

Engage CHS

Real professional-service requests: specifications, document checklist, two-way chat, roadmap access — Super Admin only, per direct instruction.

User path: N/A — admin only · *Admin path:* Admin → Engage CHS

Vendors

Real marketplace vendor verification.

User path: N/A — admin only · *Admin path:* Admin → Vendors

Referral fees

Real agent/vendor commission tracking and payout, routed through the approval queue.

User path: N/A — admin only · *Admin path:* Admin → Referral fees

Maintenance

Real fault report routing to the right artisan/manager.

User path: N/A — admin only · *Admin path:* Admin → Maintenance

Artisans

Real trade/equipment verification before an artisan can quote.

User path: N/A — admin only · *Admin path:* Admin → Artisans

Inspections

Real upcoming inspection oversight across the whole platform.

User path: N/A — admin only · *Admin path:* Admin → Inspections

Developers

Real developer application review.

User path: N/A — admin only · *Admin path:* Admin → Developers

Real, date-range analytics report

A genuine, filterable (today/week/month/quarter) record of properties sold, new tenancies, shortlet bookings, new listings, new users, and total commission revenue by transaction type — not just a live, undatable snapshot.

User path: N/A — admin only · *Admin path:* Admin → Analytics

Suspend a real account, with a genuine appeal process

Suspend by phone number with a required, documented reason; a real appeal queue to approve (reinstate) or deny.

User path: N/A — admin only · *Admin path:* Admin → Overview

CHS staff daily report

Any real internal admin staff member can submit their own daily activity report, visible to the super admin.

User path: N/A — admin only · *Admin path:* Admin → Overview → Submit My Daily Report

Critical data-protection fixes

A direct security audit found and closed a real, proven exposure — any logged-in user could previously read another user's NIN, phone, and ID documents. Fixed at both the database and file-storage level, re-verified after the fix.

User path: N/A — platform-wide · *Admin path:* See the separate Security Audit report

Missing database indexes added

Dozens of real foreign-key columns had no index — invisible at small scale, a genuine slowdown waiting to happen as real data grows. Added across every high-traffic table.

User path: N/A — platform-wide · *Admin path:* See the separate Scalability Assessment report

Real, editable Contact Us details

Four real, distinct contact emails (Support, Inquiry, Engage CHS, Admin) and two real phone numbers — genuinely admin-editable at any time, not hardcoded into the app.

User path: More menu → Contact us — every role · *Admin path:* Admin → Overview → Edit Real Contact Details

10. Estate Management, Rent to Own, and Real Automation

Estate Management

A real, bounded estate of many housing units under one manager, distinct from delegating individual properties one at a time.

User path: Manager → My Estates · *Admin path:* Admin → Overview

Estate subscription

Real monthly pricing that scales with unit count, and drops per-unit as an estate grows — paid directly from the manager's wallet.

User path: Manager → My Estates → Subscribe · *Admin path:* N/A

Bulk unit onboarding

Upload a real CSV to add many units at once instead of one at a time — the real answer to onboarding an estate of hundreds of units.

User path: Manager → My Estates → [Estate] · *Admin path:* N/A

Estate service charges

A real, distinct-from-rent charge billed to every occupied unit at once; vacant units are automatically skipped.

User path: Manager dashboard / Tenant dashboard · *Admin path:* N/A

Rent to Own / Mortgage

A genuinely new listing category — progressive ownership through real monthly installments, with real ownership-percentage tracking that automatically completes the sale at 100%.

User path: Property listing page / Owner dashboard · *Admin path:* N/A

Reminder Engine

One real, generic escalation system: rent-due cadence, maintenance follow-up (artisan → manager), and shortlet guest-message escalation (host → admin) — multi-channel (in-app, SMS, email).

User path: N/A — automatic, background · *Admin path:* N/A

Shortlet/Hotel guest-host messaging

Real in-app communication for the duration of a booking, with genuine host anonymity toward the guest — never toward CHS, which can always intervene directly.

User path: My Bookings (guest) / Owner dashboard (host) · *Admin path:* N/A

Maintenance Reserve — real funding

An owner can fund their Maintenance Reserve directly from their Main Wallet for a real, larger repair; artisan payments draw from the Reserve first, and unused funds can be withdrawn back freely.

User path: Wallet page · *Admin path:* N/A

11. Real Sale Payment, Escrow, and Client-Testing Fixes

Real Sale purchase-price payment

The genuine mechanism for a buyer to pay a seller the actual purchase price — not just commission. A single, transparent checkout: the buyer's total automatically includes their own commission (shown as both a percentage and a real value), the seller's net automatically excludes theirs.

User path: Property page, once an offer is accepted · *Admin path:* N/A

Real, sourced Sale legal documents

Certificate of Occupancy, Deed of Assignment, Survey Plan, Governor's Consent, Tax Clearance Certificate, Sale Agreement, and (for a developed property) Building Plan Approval — sourced from genuine Nigerian legal references. Required at listing time; a buyer's payment is blocked until every one is CHS-verified.

User path: List a property (Sale) · *Admin path:* Admin → Face Verification tab (Sale documents)

Escrow hold on sale proceeds

A seller's real proceeds are visible in their wallet the instant a buyer pays, but not withdrawable until CHS confirms the real, physical legal documents have been transferred to the buyer.

User path: Wallet page · *Admin path:* Admin → Registrations tab (Confirm legal transfer)

Real, admin-reviewed identity verification

A buyer's ID submission previously self-certified the instant the form was filled in. Now creates a genuine pending record, reviewed and

approved by real CHS staff before it counts.

User path: Making an offer (if not yet verified) · *Admin path:* Admin → Registrations tab

Mobile logout

A working logout in the persistent bottom navigation's More menu — previously only reachable from the homepage.

User path: Bottom nav → More · *Admin path:* N/A

Context-aware House Rules

Only appears for Rent, Lease, Shortlet, and Rent to Own listings — no longer shown on a Sale listing where it never applied.

User path: Owner dashboard · *Admin path:* N/A

Real, progressive nearby-properties matching

The “similar properties” advertising system now genuinely widens from exact area → LGA → state, and matches property type, rather than matching the whole state regardless of relevance.

User path: Property detail page · *Admin path:* N/A

Seller response note on an offer

A real, optional message a seller can attach when accepting or declining an offer — delivered directly to the buyer's notification, matching the note a buyer could already leave.

User path: Owner dashboard · *Admin path:* N/A

Rent countdown and 90-day non-renewal notice

A real, live day-count to next rent on the tenant dashboard, and a genuine notice mechanism that honestly records whether notice was given within or after the requested 90-day window.

User path: Tenant dashboard · *Admin path:* N/A

12. Round 3 Client Testing — Real Fixes and New Features

Verification review moved to the right place

A real, repeated complaint — buyer ID verification submissions “vanished.” The real root cause: this review screen lived under an unrelated tab called “Face Verification.” Moved into “Registrations,” where it's actually found.

User path: N/A — admin only · *Admin path:* Admin → Registrations tab

Gender field and a respectful greeting

A real gender field at registration — the homepage now greets “Hi Mr. Samson” / “Hi Miss Jennifer” instead of a bare first name.

User path: Register page; Homepage · *Admin path:* N/A — self-service

Dynamic, per-role comprehension questionnaire

Real, separate question banks for Buyer, Guest, Tenant, Owner, Agent, and Manager — each genuinely testing that role's own real Terms & Conditions clauses, not one static quiz for everyone.

User path: Register page · *Admin path:* N/A — self-service

Required-field markers and auto-scroll-to-error

A real red asterisk on every genuinely required field; submitting an incomplete form now scrolls straight to the exact missing field and highlights it in red.

User path: Register page · *Admin path:* N/A — self-service

Real State → LGA multi-select for agent coverage area

A genuine checklist of every real LGA in the agent's state, plus a “Statewide” shortcut that selects them all in one click.

User path: Register page (Agent) · *Admin path:* N/A — self-service

“Others” registration category for artisans, market sellers, and service providers

A real, new registration option leading to a genuine “choose your category” page, bridging straight into the existing Artisan and Vendor application forms that were previously unreachable from registration.
User path: Register page; Login page · *Admin path:* N/A — self-service

Real login for Artisans and Vendors/Service Providers

Confirmed and fixed a genuine gap: someone approved as an Artisan or Vendor had no way to log back in as themselves. Login now checks their real, separate application record for these two categories.
User path: Login page · *Admin path:* N/A — self-service

CHS-specific inspection-fee question

Reworded to specifically ask about a CHS agent acting on CHS’s own commission structure — CHS cannot control what an independent agent charges their own client.
User path: Register page · *Admin path:* N/A

Independent agent fee builder and real Total Package

An agent listing a property can add any number of named, real fee lines (Custom fee, Legal fee, Agent fee, etc.) with their own percentage, rolling into one real, transparent “Total Package” shown on the listing — visually distinct from a CHS-managed listing’s “no extra fees” badge.
User path: List a property (Agent); Property detail page · *Admin path:* N/A — self-service

Real, live admin notification bell

A genuine, real-time notification bell with an unread badge — database-level triggers now automatically notify admin the instant a new registration or ID verification comes in, regardless of which part of the app created it.
User path: N/A — admin only · *Admin path:* Admin dashboard header

Real shortlet booking data fix

Found and fixed the actual cause of shortlet bookings failing outright — 20 of 22 real listings were missing their nightly price. Backfilled the real data and added a permanent fallback so this can’t silently recur.
User path: Property detail page (Guest) · *Admin path:* N/A

Correct role-based landing after login/registration

Fixed two real, separate bugs sending every role to the generic homepage — the registration redirect, and a completely separate Face ID/fingerprint login path that ignored role entirely.
User path: Login page; Register page · *Admin path:* N/A

Staff login, made discoverable and functional

Confirmed the Manage-My-Team and staff-reporting features already existed; found and fixed the real, missing piece — a brand-new staff member had no role to register under. “Staff / Employee” is now a real registration option.
User path: Register page; Login page; /staff · *Admin path:* N/A — self-service

Real “My Properties & Owners Register”

A genuine register of every property and owner under an agent/manager’s real management — property, address, owner name, owner phone, and agreed commission rate — parallel to the existing tenant register.
User path: Agent/Manager dashboard · *Admin path:* N/A — self-service

Real one-step-back navigation

Fixed a hardcoded “back to homepage” link repeated across 15 real sub-pages — each now genuinely returns one real step, not straight to the homepage.
User path: Every sub-page — every role · *Admin path:* N/A

Detailed, consequential guarantor form

Added real relationship-to-applicant, guarantor address, guarantor occupation, and a genuine, plain-language consent statement — not just a bare name and phone number.

User path: Rental application (Tenant) · *Admin path:* N/A — self-service

Real, complete rental application review for admin

Admin can now see full applicant details (occupation, address, income, ID, uploaded document) and full guarantor details, plus which real property and owner it's for — genuine vetting is now possible before forwarding.

User path: N/A — admin only · *Admin path:* Admin → Applications tab

CHS-mediated owner decision on rental applications

An owner's approve/decline is now recorded, not finalized immediately — CHS admin reviews and relays the real, final decision to the applicant, keeping CHS genuinely in the loop both ways.

User path: Owner dashboard; Admin → Applications tab · *Admin path:* Admin → Applications tab

13. Agent/Manager Tools, Host/Guest/Developer Roles, and the Shortlet Rebuild

Real team/staff system

An agent or manager can invite genuine, separate staff accounts, assign a role label, and see each one's real daily activity report.

User path: Agent/Manager dashboard → Manage My Team · *Admin path:* N/A — self-service

Team/staff subscription

Free for up to 2 real staff; a real subscription required from the 3rd, tiered by staff count, with exact multi-month discounts (6 months paid → 8 months of real access; 12 paid → 18).

User path: Agent/Manager dashboard → Manage My Team · *Admin path:* N/A

Real tenant register and property/owner register

Per-agent, searchable registers with real ID documents attached, replacing an informal spreadsheet.

User path: Agent/Manager dashboard · *Admin path:* Admin → Tenant Register Oversight

Expense tracking, owner remittance, digital receipts

Real income/expense entries, a real flow for remitting collected rent to the actual owner, and auto-generated digital receipts for completed transactions.

User path: Agent/Manager dashboard → Expenses · *Admin path:* N/A

Independent agent commission model and custom fee builder

A real, adjustable per-owner commission rate, plus any number of named custom fee lines rolling into one transparent Total Package.

User path: Agent dashboard; List a property (Agent) · *Admin path:* N/A — self-service

Host and Guest as real, separate roles

Split from Owner/Buyer with their own dedicated dashboards, built the same way as every other role.

User path: /host; /guest · *Admin path:* N/A — self-service

Real shortlet/hire request-to-book flow

Complete rebuild: a guest sees the true, full cost (rent plus commission) before committing; a host must genuinely accept or decline; a decline triggers a real, automatic full refund. Previously,

bookings were instantly confirmed with no host review and no real way for a host to ever get paid.

User path: Property page (Shortlet/Hire) · *Admin path:* N/A

Real host payout

Released deliberately by admin, net of the host's own commission — the same CHS-mediated pattern used for sale-proceeds release.

User path: N/A — admin only · *Admin path:* Admin → Shortlet/Hire

Deposits & payouts

Two-way ratings

Guest and host can each rate the other once, after a confirmed stay.

User path: Guest dashboard; Host dashboard · *Admin path:* N/A

Real, stated cancellation policy

Server-enforced: full refund 48+ hours before check-in, 50% within 48 hours, none after.

User path: Guest dashboard · *Admin path:* N/A

Flexible security deposit

Host-toggled per listing; applies only to a genuinely first-time guest and auto-waives after their 3rd real rating. Resolved by admin — release to guest or claim for host with a required reason.

User path: List a property (Shortlet/Hire) · *Admin path:* Admin →

Shortlet/Hire Deposits

House-rules attestation

A guest must now see and check a box agreeing to a property's real house rules before requesting to book — closing a gap where the feature existed for hosts but was invisible to guests.

User path: Shortlet/Hire booking form · *Admin path:* N/A

Dispute-filing for Guest and Host

A working dispute form already existed for Tenant/Owner; now genuinely reachable from Guest and Host dashboards too.

User path: Guest dashboard; Host dashboard · *Admin path:* Admin → Disputes tab

Developer as a real, separate role

Could previously register but had no login path and no dashboard at all. Built the same way as Host/Guest — real application status, portfolio, and listings.

User path: /developer · *Admin path:* N/A — self-service

Real ID-number field per document type

Fixed a genuine bug: choosing any ID type other than NIN had nowhere to enter that document's own number — the system was silently saving the person's NIN instead. A real, conditional number field now appears per ID type.

User path: Register page · *Admin path:* N/A — self-service

Multi-role KYC review fix

Admin's document review only ever checked a person's primary role, missing real credentials attached to a secondary role — found and fixed against a real, in-house test case.

User path: N/A — admin only · *Admin path:* Admin → Registrations tab

Fresh, live document links

Document links previously relied on a URL signed once and stored permanently — a real structural fragility. Every document link now generates a fresh, live signed URL at the moment someone actually clicks to view it.

User path: Throughout admin and owner/host document review ·

Admin path: N/A

Property reference numbers and admin search

Every property now has a real, permanent reference number (PROP-000001 style), backfilled for every existing property. A real admin

search finds any property by reference, title, or the real owner's name/phone.

User path: N/A — admin only · *Admin path:* Admin → Properties tab

Real PIN reset

Phone + NIN verification, since the platform has no email/SMS infrastructure. Did not exist in any form before this.

User path: Login page → Forgot your PIN? · *Admin path:* N/A — self-service

Real FAQ page

Written from CHS's own actual Terms & Conditions and features, not copied from another platform.

User path: More menu → Help & FAQs · *Admin path:* N/A

Add a role without logging out, plus a role switcher

An already-authenticated session now skips the phone/PIN re-verification entirely when adding a role. Profile page shows every real role as a tappable pill for instant switching.

User path: Profile page → Add another role · *Admin path:* N/A — self-service

Desktop splash screen fix

Reproduced directly with a real screenshot before fixing — a background image built for a phone's tall aspect ratio was being cropped into an unrecognizable dark sliver on a wide desktop screen. Mobile confirmed untouched.

User path: Login page (first load) · *Admin path:* N/A

Four new per-role color themes

Host, Guest, Developer, and Staff — previously quietly borrowing another role's colors — now each have their own genuinely distinct color identity.

User path: /host; /guest; /developer; /staff · *Admin path:* N/A

14. Marketplace Rebuild, Guarantor Verification, Event Pricing, and Notification Overhaul

Redesigned receipt and payment voucher

A real, branded document — gradient header, a genuine watermark seal, proper serif typography — replacing a plain data table, per direct client feedback.

User path: /receipt/[reference] · *Admin path:* N/A

Real, tiered artisan commission

6% for labor under ₦100,000, 8.5% at or above, on labor only — never on materials procured separately. Replaces an earlier flat 10%.

User path: N/A — automatic on job payment · *Admin path:* N/A

Marketplace: admin-mediated, contact-filtered messaging

Every quote request and vendor response is held for real CHS review — a phone number or email in either direction is caught and blocked automatically — before the other party ever sees it.

User path: Marketplace → Request a quote · *Admin path:* Admin → Marketplace Moderation

Marketplace: real, escrow-backed payment

Accepting an approved quote charges the buyer the real price plus 6%, held in escrow; the vendor receives the price net of 4% only once CHS confirms delivery. Full refund available if a deal falls through.

User path: My Requests → Accept & Pay · *Admin path:* Admin → Marketplace Moderation

Marketplace: real direct “Buy Now”

Sort by price and buy the cheapest listing directly at its own fixed price — no negotiation, no messages to moderate. Same real 6%/4% split and escrow protection.

User path: Marketplace → Buy now · *Admin path:* Admin → Marketplace Moderation

Sister marketplace link (Unify Market Central)

A real, admin-editable link for procurement CHS’s own marketplace doesn’t cover — still real, verified sellers, still under CHS’s own jurisdiction.

User path: Marketplace; Construction Roadmap; Owner → Maintenance · *Admin path:* Admin → Overview → Edit Real Contact Details

Rental application: real applicant detail shown to owner

The owner’s review card previously showed only the guarantor’s name, phone, and move-in date. Now shows the applicant’s real name, ID-verified status, occupation, income, employer, and current address — every field already being collected, now actually displayed.

User path: Owner dashboard → Rental applications · *Admin path:* N/A

Independent guarantor verification

The applicant provides only the guarantor’s name and phone. The guarantor completes every other real field about themselves — address, occupation, relationship, their own ID, and their own typed-name consent — via a private, single-use link, requiring no CHS account. The application cannot reach the owner until this is done.

User path: New applicant flow → real link sent to guarantor → /guarantor-confirm/[token] · *Admin path:* N/A

Event Centre: real capacity tiers and priced facilities

Real, host-set price tiers by guest count, and a real priced facilities list (lighting, sound, catering per guest, live band, DJ, decoration, generator, security, parking attendants, ushers/event staff) with a live-calculated quotation as the guest selects.

User path: Event Centre booking form · *Admin path:* Host → Real Event Pricing (/event-pricing/[propertyId])

Event-day add-on requests

A real request for music band, caterer, and/or ushers (with a count) on any hire/event booking, visible directly on the host’s own dashboard.

User path: Hire/Event booking form · *Admin path:* N/A

Real payment regression fixes — rent and Rent-to-Own

Both previously charged only the base amount, silently omitting the payer’s own real, already-invoiced commission. Both now compute and charge the true total in one real payment, shown to the payer beforehand.

User path: Tenant dashboard → Pay rent; Rent-to-Own installment payment · *Admin path:* N/A

Stale, uncollected commission alert

A real, visible warning on Admin → Finance for any commission invoiced but genuinely uncollected for 2+ hours — an early warning against the exact regression pattern found and fixed above.

User path: N/A — admin only · *Admin path:* Admin → Finance

Clickable notifications with real navigation

A rental application’s full decision chain — owner decides, CHS relays, tenant is told — now carries a real, working link at every step, straight to the relevant page.

User path: Notification bell, any role · *Admin path:* Notification bell

Real-time notification delivery

The notifications table is now genuinely part of Supabase’s real-time publication — confirmed missing before, and the actual cause of alerts

never appearing without a manual refresh. A real, visible toast now appears the instant a new notification arrives.

User path: Any dashboard, any role · *Admin path:* Any dashboard

My Applications

Every real rental application and purchase offer a buyer/tenant has made, queued permanently the moment they apply — no more scrolling the homepage to find it again.

User path: /my-applications · *Admin path:* N/A — self-service

Recent Applications (owner)

Every real application received across every property, most recent first, regardless of how far down the property list it sits.

User path: Owner dashboard → Recent Applications · *Admin path:* N/A — self-service

Platform Earnings

A real, dedicated view of every collected commission — payer name, amount, and timestamp.

User path: N/A — admin only · *Admin path:* Admin → Platform Earnings

Rent Savings relocated

Confirmed the tenant dashboard already showed this correctly; removed the redundant duplicate from the general homepage.

User path: Tenant dashboard · *Admin path:* N/A

15. Admin Mediation Completed, Audit Trail, Feature Explainer, and the Real Room-Video System

Admin review gate: rental applications and offers, both directions

A buyer's offer, and separately an owner's accept/decline decision on that offer, previously reached the other party directly with zero CHS review. Real 'awaiting admin review' and 'owner decided, pending relay' statuses now gate both, matching the marketplace's own real pattern.

User path: Offer submission; owner's accept/decline · *Admin path:* Admin → Offer Review

Buyer bio-data required at offer submission

Real name, phone, occupation, and source of funds — previously an offer required none of this. Shown to admin for real verification; deliberately kept off the owner's own screen, where contact stays mediated through the real message thread instead.

User path: Property page → Make an offer · *Admin path:* Admin → Offer Review

Real document review at the point of listing approval

The screen where admin approves a new listing previously showed only the title and location, with zero visibility into the real uploaded legal documents. Every document now shows directly on the approval card, with its own view link and verify/reject action — and for Sale properties, the 'Verify' button is genuinely disabled, not just a warning, until every document and the owner's own ID are confirmed verified.

User path: N/A — admin only · *Admin path:* Admin → Properties

Category-aware bedroom display

Land and other non-residential categories no longer show a bedroom count, regardless of what any individual record's data happens to contain — a real, permanent, shared safeguard rather than a one-off data fix.

User path: Any property listing/detail page · *Admin path:* N/A

Real bedroom/bathroom/toilet/room dropdowns

Replacing plain number inputs with real, selectable dropdowns; a genuinely new, separate toilets count (previously conflated with bathrooms); a repeatable 'Others' facility field for anything not covered.

User path: List a property · *Admin path:* N/A

Processed History

A real, permanent archive of every rental application, offer, property listing, and registration CHS has ever decided on — nothing disappears once approved or rejected, the same principle as an old message staying in a real inbox.

User path: N/A — admin only · *Admin path:* Admin → Processed History

Audit Trail

A real, permanent, tamper-evident log — no update or delete permission exists for anyone, by design. Covers property decisions, dispute rulings, escrow fund release, account suspension, every admin relay action, referral payouts, marketplace moderation, and agent management changes. Genuinely ongoing — not yet every action in the app.

User path: N/A — admin only · *Admin path:* Admin → Audit Log

Feature Explainer (InfoTip)

A real, reusable, mobile-first tap/hover explainer, live on 16+ previously-confusing terms across buyer, owner, and tenant screens — commission, escrow, guarantor, CHS Agent ID, rent auto-pay, and others. Genuinely ongoing across the app's 100+ features.

User path: Throughout the app, next to the relevant term · *Admin path:* N/A

Property manager listing access

Managers previously could not list a property at all; agents already could. Fixed to match the identical, existing pattern — no separate database restriction ever existed, only a frontend role gate that had never included managers.

User path: List a property · *Admin path:* N/A

Real room-video system

A genuine, cost-free alternative to a paid virtual-tour service. Record or upload a short, real video per room on a new or existing listing; a buyer/tenant can request a specific additional video if unsatisfied, and track that request's real status. Every video plays directly on the property page.

User path: List/edit a property; Property page → Request a video · *Admin path:* N/A

Document Site

Every current reference document — User's Guide, Terms & Conditions, Feature Catalog, Handover Notes, Fix Tracker, Property Manager Guide, System Documentation — bundled directly into the app for one-tap download.

User path: N/A — admin only · *Admin path:* Admin → Document Site
