CHS Team access: how staff and admins log in

For CHS staff admins only. Do not share. 19 October 2026.

Your own door

Staff and admins do not log in on the normal CHS login page. Customers never see this door. The address is the CHS app address followed by:

/team-access

Example: https://(the CHS app address)/team-access . Save it as a bookmark on your PC, or on a phone use Share > Add to Home Screen from that page. Never post this address anywhere.

How you get in, step by step

1. The super admin invites you (see the invite below). You must first have a normal CHS account made with your own phone number.
2. Open the invite link within 10 minutes and tap Accept. It works once.
3. Go to the team address above and enter your phone number and PIN.
4. The code screen opens and the super admin is told. Ask the super admin for your one-time code (valid 5 minutes, works once) and enter it.
5. Work as usual in your own area. After 120 minutes with no activity you are logged out; repeat from step 3.

If something goes wrong

Three wrong codes lock your account; only the super admin can unlock it. A wrong phone number or PIN always shows the same message. If you use the normal customer login page with a staff account it will say the PIN is wrong; that is intended.

Rules

Never share your PIN or a code. The super admin will never ask for your PIN. Report any lost phone at once so your access can be removed.
