CHS Marketplace Guide

Vendors and Service Providers, end to end, with test steps.
Version for testing round 5.

1. The two categories in one minute

	Vendor	Service Provider
What they offer	Goods: Interior Design, Furniture, Bedding & Textiles, Home Equipment (Electronics and Home Appliances), Kitchen Supplies, Building Materials	Services: Security, Cleaning, Fumigation & Pest Control, Facilities Maintenance
How they join	Become a Vendor form, then CHS verifies	Become a Service Provider form, then CHS verifies
Who posts	The vendor posts products with price, photos and stock	The provider posts the service and its price list
Who requests	A buyer either buys a listed product directly, or asks for a quote	A client asks for a quote (a service usually needs a site visit or details first)
Who pays	The buyer, always into the CHS wallet and escrow	The client, always into the CHS wallet and escrow
When the vendor/provider is paid	After the buyer confirms delivery (or CHS releases)	After the client confirms the work is done (or CHS releases)

> **Rule that never changes:** every request and message goes through CHS. The buyer and the vendor never see each other's phone numbers, and nobody pays any account claiming to be the platform. Every payment is made from the CHS wallet.

2. Vendor workflow

A. Direct purchase (a product with a price)

#	Who	What happens
1	Vendor	Opens the Vendor page and uploads a product (name, price, photos, stock, category-specific details).
2	Admin	Reviews the listing; once approved it shows in the Marketplace.
3	Buyer	Opens Marketplace, picks the product, chooses quantity and enters the delivery address, then presses Buy.
4	Platform	Takes price plus the 6% platform fee from the buyer's wallet into escrow. Stock is reduced.
5	Vendor	Sees the order in My Orders, delivers through CHS.
6	Admin	Once delivery is confirmed, releases the order. The vendor is credited the price less 4% commission.
7	Admin	If the delivery fails, refunds the buyer from escrow.

B. Quote (a buyer wants something priced)

#	Who	What happens
1	Buyer	Sends a quote request (what, quantity, location). Contact details in the text are blocked automatically.
2	Admin	Reviews and relays the request to matching vendors, or blocks it.
3	Vendor	Answers with a price and delivery time.
4	Admin	Reviews the answer and relays it to the buyer, or blocks it.
5	Buyer	In My Quote Requests, accepts the quote and pays from the wallet. The money is held in escrow.
6	Admin	After delivery is confirmed, releases the escrow to the vendor.

C. The Vendor dashboard (new in this round)

Tab	What it shows
My Stocks	Every product with its stock level; low stock highlighted
My Orders	Orders from the platform, newest first
My Subscription	Promotion plan, amount paid, duration and days left
My Sales	Recent sales, or a custom date range
My Recent Bids	Quote responses the vendor has made and their outcome
My Total Earnings	Earnings for a recent period or a custom range
Commission Paid	Commission taken by CHS on each sale
General Statistics	Balance sheet: sales, stock, earnings, commission payout

Honest limit: the platform does not yet have a board where CHS publishes "wanted items" for vendors to bid on. My Recent Bids today shows the quote responses only.

3. Service Provider workflow

#	Who	What happens
1	Provider	Registers through Become a Service Provider, picks a category and lists the service. CHS verifies.
2	Client	Searches the Marketplace service categories and sends a quote request describing the job and place.
3	Admin	Relays the request to the provider (or blocks it if it contains contact details).
4	Provider	Responds with a price and when the work can be done.
5	Admin	Relays the answer to the client.
6	Client	Accepts and pays from the wallet. Money sits in escrow.
7	Provider	Does the work.
8	Client / Admin	Work confirmed, then admin releases the payment to the provider less commission.
9	Tenant	Tenants can also pay a service charge raised on their account from the Tenant page.

4. Test data to create

Use PIN **123456** for every test account. Create these by signing up in the app (the new phone numbers keep them apart from earlier test accounts).

Role	Phone	Setup
Buyer	08130000001	Fund the wallet with 500,000 by the normal top-up. Complete ID verification.
Vendor (Electronics)	08130000002	Become a Vendor, category Home Equipment. Add 2 products: "Samsung 43 inch TV" 285,000 stock 5; "LG Fridge" 340,000 stock 3.
Vendor (Furniture)	08130000003	Category Furniture. Add "3-seater sofa" 180,000 stock 4.
Service Provider (Cleaning)	08130000004	Become a Service Provider, category Cleaning. Post "Deep cleaning, 3-bedroom flat" from 45,000.
Service Provider (Security)	08130000005	Category Security. Post "Guard, night shift, per month" 90,000.
Admin	your admin account	Verify the four vendors/providers and approve the listings.

5. Test scripts

Test	Steps	Expected result
V1 Direct buy	Buyer buys the TV, quantity 1, with a delivery address.	Wallet drops by 285,000 + 6%. Stock falls to 4. Order shows in the vendor's My Orders and the admin queue.
V2 Release	Admin releases the order after delivery.	Vendor credited 285,000 less 4%. Appears in Total Earnings, Commission Paid and Sales.
V3 Refund	Buy the fridge, then admin refunds it.	Buyer gets the money back, stock restored.
V4 Quote	Buyer asks for a quote on 10 sofas. Admin relays. Vendor answers 1,650,000. Admin relays. Buyer accepts and pays.	Each step visible to the right person only, no phone numbers anywhere, money held in escrow.
V5 Blocked contact	Put a phone number in a quote request.	Blocked and flagged to admin.
V6 Dashboard	Open each vendor tab; use a custom range that covers yesterday.	Figures agree with the orders above.
S1 Service quote	Client asks for deep cleaning, a 3-bedroom flat. Admin relays. Provider quotes 60,000. Admin relays. Client accepts and pays.	Same chain as V4 for a service.
S2 Service release	Client confirms the job, admin releases.	Provider paid less commission, shown in earnings.
S3 Wrong user	A vendor tries to open the admin page or another vendor's orders.	Refused.

Service Provider screens have not been tested before this round. Please report anything that does not match the Expected column.
