CHS Host Guest Demo Guide

CHS — Host & Guest Demo Testing Guide (Updated)

Real, working demo accounts — already tested, end to end, before handing this to you

I ran the complete real chain myself first: booked a real 2-night stay, confirmed the guest's wallet dropped by exactly the right amount, and confirmed both the new Guest dashboard and the new Host dashboard correctly show the booking, with the guest's ID visible to the host. I then removed my own test booking, so your real test starts completely clean.

Real login details — both sides

Role	Phone	PIN	Login category to select
Host	08050000009	123456	**Host** (this account also has Owner — you'll see a "switch to Owner dashboard" link, but select Host to land on the new Host page)
Guest	08050000010	123456	**Guest**

The real, ready listing to book

"Cozy 2-Bedroom Shortlet, Barnawa" — ₦40,000/night, active and correctly priced.

Step-by-step — testing as the Guest

1. Log in with **08050000010**, PIN **123456**, selecting **Guest**.
2. You should land directly on **"My Guest Dashboard"** — not the homepage.
3. You should see real, categorized sections: Shortlet Apartments, Hotels & Lodges, Event Centres, Recreational & Sports, Casual Car Parks, Cinema & Entertainment — whichever categories currently have real listings.

4. Find **“Cozy 2-Bedroom Shortlet, Barnawa”** under Shortlet Apartments and tap it.
5. Tap **“Book now,”** choose real dates, enter your name/phone, and upload any real image as your ID.
6. Confirm and pay from your real wallet balance.
7. Go back to **My Guest Dashboard** — your new booking should now appear at the top, under “My Real Bookings.”

Step-by-step — checking it as the Host

1. Log out, then log in with **08050000009**, PIN **123456**, selecting **Host**.
2. You should land directly on **“My Host Dashboard”** — showing your real listings and a real “switch to Owner dashboard” link.
3. Under **“Real Guest Bookings,”** you should see the booking you just made as the guest, including:
   - The guest’s name and phone
   - **A real, working “View guest’s uploaded ID” link**

If anything doesn’t match this exactly

Tell me precisely which step didn’t behave as described, and I’ll check the real, live data immediately.

New since this guide was written (October 2026)

The booking flow in this guide still applies. These things are new, so you will see them when you test:

- **Finding a place for your dates.** On the home page, choose check-in and check-out dates and CHS shows only the hotels, lodges and shortlets that are free on those dates. You can also filter by accessibility (for example step-free access). A host ticks the accessibility features when listing, and they must be true.
- **Booking several rooms in a hotel or lodge.** Choose how many rooms and how many adults and children. CHS requests each room as its own booking, linked together. The host confirms the dates, and when it is time to pay you can use "Pay all N rooms at once" instead of paying one room at a time. Your wallet must hold the total. Under Extras you can ask for breakfast, half or full board, an extra bed, airport pickup, laundry, early check-in, late check-out, cleaning or a baby cot; the host answers with a price and you pay through CHS.
- **Weekly and monthly discounts.** A host can offer a weekly discount (7 nights or more) and a monthly discount (28 nights or more), up to 50%, from the host page under Stay offers. The guest sees the discount as its own line in the price, and CHS's fees are worked out on the discounted price.
- **Group and corporate enquiries.** On a hotel, lodge or shortlet page a guest can send a group enquiry (names, number of guests and rooms, dates, purpose). It goes to the host through CHS. Phone numbers, emails and links are refused, and five enquiries a day is the limit. An enquiry is not a booking; the booking itself is made and paid on CHS.
- **Ratings.** A property page shows a summary of its ratings. A guest can rate only after the stay has started, and a rating cannot contain contact details.

For event centres, advance payments, documents, capacity and seating, see section 19C of the Users Guide.
