CHS Rent-to-Own Testing Guide

CHS — Rent-to-Own (Mortgage) Testing Guide

Written directly from the real, working code — every step below matches exactly what the system actually does, not a general description.

What Rent-to-Own actually is on CHS

A real, distinct listing category — separate from a normal sale or a normal rental. A buyer pays a real, fixed monthly amount toward a property instead of paying the full price at once. Each real payment genuinely increases their real ownership percentage, tracked live, until it reaches 100%.

Step 1 — The seller lists the property as Rent-to-Own

1. Log in as an **owner** account.
2. Go to **List a Property**.
3. Under **Purpose**, choose **“Mortgage (Rent to Own)”** — this is a real, separate option from “For Sale” or “For Rent.”
4. Fill in the real, required terms specific to this purpose:
   - **Monthly amount** — the real naira amount the buyer will pay each month.
   - **Duration (years)** — how long the full arrangement runs.
   - **Portion (%)** — what percentage of the full price this arrangement covers (usually 100%, unless the seller wants a partial arrangement).
5. Submit and wait for real CHS verification, same as any other listing.

Step 2 — The buyer requests to start

1. Log in as a **buyer** account (any real, ID-verified buyer).
2. Find the real, verified Rent-to-Own listing and open it.
3. Click **“Request Rent-to-Own.”**
4. This does **not** charge anything yet — it sends a real request to the owner for approval. The buyer sees: *“Request sent — the owner will review and approve it.”*

Step 3 — The seller approves

1. Log in as the **owner** of that property.
2. A real notification arrives: *“New Rent-to-Own request.”*
3. Opening it takes the owner straight to their own property page, where the real, pending request is shown directly — buyer’s name,

phone, and the real monthly amount — with a single **“Approve this real request”** button.
4. Once approved, the real agreement becomes active.

Step 4 — The buyer pays monthly

1. As the same buyer, go to **My Offers → “Have a Mortgage (Rent to Own) agreement instead?”** — this links straight to the real, dedicated Rent-to-Own page.
2. The real, live progress bar shows the current ownership percentage.
3. Click the real **“Pay this month’s installment — [amount]”** button.
4. Each real payment updates the ownership percentage immediately — genuinely calculated from the real amount paid so far against the real total price, not a placeholder number.

Step 5 — What happens at 100%

Once the buyer’s real, cumulative payments reach the full portion agreed, the system automatically treats the sale as complete — the same real legal-document and escrow process used for a normal sale purchase takes over from there.

A real, complete test in order

#	Who	Action
1	Owner	List a property with purpose “Mortgage (Rent to Own)”
2	Buyer	Open the listing, click “Request Rent-to-Own”
3	Owner	Open the notification, approve the real request
4	Buyer	Go to My Offers → Rent to Own, make a real monthly payment
5	Both	Confirm the ownership percentage genuinely increased
6	Buyer	Repeat payments until 100% is reached, confirm the sale-completion flow begins

---

Following these six steps in order, with one real owner account and one real buyer account, tests the entire real Rent-to-Own system end to end.
