Rent-to-Own (Mortgage) — Test Guide

Four test properties, the logins to use, the rules, the documents, and step-by-step scripts

Complete Housing Solutions · October 2026 · Site: https://startling-frangipane-b22faf.netlify.app

What this lets you test

- **The whole life of a rent-to-own deal:** a verified buyer asks to own a property; the owner approves; the buyer pays instalments from the wallet; their ownership percentage climbs; at 100% the property transfers.
- **The quick one:** the QUICK-TEST studio needs only **3 payments**, so you can watch ownership transfer in about ten minutes.
- **The money:** exactly what the buyer pays, what the owner receives, and what CHS earns on every instalment — with the numbers to expect printed beside each step.
- **The safeguards:** only a verified buyer can ask; only one active agreement per property; nobody pays before approval; nobody overpays.

Four things were fixed while preparing these tests (found by running the whole cycle first):

- **The buyer would have overpaid.** Ownership was built from rounded gains, so after paying the *full price* it read 99.99% and one more instalment was demanded (a 121st payment on a 120-payment house). Ownership is now worked out exactly from what has been paid, and the last instalment is only what is still owed.
- **A house could be sold twice.** An owner could approve a second buyer on a property that already had an active agreement. A property can now have only one; approving one buyer declines the other pending requests and tells those buyers.
- **The owner saw the buyer's phone number.** It now shows the buyer's name and a CHS reference only — contact goes through CHS.
- **Requests bypassed CHS.** A request went straight to the owner and admin never saw it. Now **every request goes to the Admin dashboard first** (Rent-to-Own Requests tab); admin relays it to the owner or rejects it with a reason. The owner's approval box moved to the **top** of the Owner dashboard.

1. How Rent-to-Own works on CHS

In the app the feature is called **“Mortgage (Rent to Own)”**. The buyer pays for the property in monthly instalments; each instalment buys a slice of ownership; when the slices add up to the whole price, the property is theirs. The rules, as the system enforces them:

#	Rule	In practice
1	The owner lists the property as Rent to Own	With a price, a monthly instalment and a term in years. Price ÷ monthly instalment = the number of payments.
2	The buyer must be fully verified	Both ID and liveness checks. An unverified buyer is refused with “Please verify your identity first”.
3	CHS relays, then the owner approves	Every request goes to CHS first: admin relays it to the owner, or rejects it with a reason. Only then can the owner approve. No money moves at the request or the approval. A buyer can ask for a given property once.
4	One active agreement per property	When the owner approves a buyer, the property's other pending requests are declined and those buyers are told. A second approval is refused.
5	Each instalment is paid from the CHS Wallet	The buyer pays the instalment **plus a 5.5% CHS commission**. Nobody can pay before the owner approves.

#	Rule	In practice
6	The owner is paid at once	The owner's wallet is credited the instalment **less a 4.5% CHS commission**, straight away (instalments are not held back).
7	CHS earns 10% of every instalment	5.5% from the buyer + 4.5% from the owner, both recorded when the payment is made (Admin → Platform Earnings).
8	Ownership is exact	Ownership % = total paid ÷ price × 100. The last instalment is only what is still owed, so the buyer never pays more than the price.
9	At 100% the property transfers	The agreement becomes “completed”, the property is marked sold, and both sides are told. This cannot be undone.

Worked example — the QUICK-TEST studio (price ₦1,200,000, instalment ₦400,000):

Payment	Buyer pays (₦400,000 + 5.5%)	Owner receives (₦400,000 − 4.5%)	CHS earns	Buyer's ownership	Agreement
1	₦422,000	₦382,000	₦40,000	33.33%	Active
2	₦422,000	₦382,000	₦40,000	66.67%	Active
3	₦422,000	₦382,000	₦40,000	**100.00%**	**Completed — property sold**
Total	₦1,266,000	₦1,146,000	**₦120,000**		

2. The four test properties

Reference	Property	Price	Instalment	Payments	Owner login
PROP-000852	**QUICK-TEST** Studio Apartment, Malali, Kaduna	₦1,200,000	₦400,000	3	08050000003
PROP-000850	2-Bedroom Flat, Barnawa, Kaduna	₦18,000,000	₦250,000	72 (6 years)	08120000001
PROP-000833	3-Bedroom Semi-Detached Duplex, Kawo, Kaduna	₦36,000,000	₦300,000	120 (10 years)	08120000001
PROP-000851	4-Bedroom Detached House, GRA Phase 2, Port Harcourt	₦84,000,000	₦1,000,000	84 (7 years)	08050000003

What each instalment costs and earns:

Property	Buyer pays each time	Owner receives each time	CHS earns each time	Ownership gained per payment	CHS earns over the whole term
Studio (3)	₦422,000	₦382,000	₦40,000	33.333%	₦120,000
Barnawa flat (72)	₦263,750	₦238,750	₦25,000	1.389%	₦1,800,000
Kawo duplex (120)	₦316,500	₦286,500	₦30,000	0.833%	₦3,600,000
GRA house (84)	₦1,055,000	₦955,000	₦100,000	1.190%	₦8,400,000

3. Who to log in as

Log in with the **phone number** and the **PIN 123456**. Every account below is approved and fully verified (the system requires that of a buyer), so none of them needs a verification step first.

Role in the test	Phone	Name	Wallet now	Use it for
BUYER 1 (pays to own)	08120000003	Demo Round2 Buyer	₦39,827,500	The main buyer for every script
BUYER 2 (a tenant paying to own)	08050000006	Demo Office Tenant	₦8,395,000	The competing buyer; also pays on the GRA house (₦1,055,000 a time)
OWNER A	08120000001	Demo Round2 Owner	₦101,416,000	Owns the Barnawa flat and the Kawo duplex
OWNER B	08050000003	Demo House Seller	₦30,550,000	Owns the QUICK-TEST studio and the GRA house
ADMIN	your own admin login	—	—	Watch Platform Earnings and notifications

> **Which owner?** The QUICK-TEST studio and the GRA Phase 2 house belong to **08050000003** (Demo House Seller). The Barnawa flat and the Kawo duplex belong to **08120000001** (Demo Round2 Owner). Log in as the wrong owner and the request will, correctly, not appear.

Wallet balances change as you test. If a buyer runs short, the pay button shows “Insufficient wallet balance”; ask for a top-up.

4. Test scripts

Script 1 — the QUICK-TEST studio: the whole cycle in ten minutes

Step	Log in as	Where	Do this	You should see
1	BUYER 1 08120000003	Property page of PROP-000852 (search “QUICK-TEST”)	Tap **Request Mortgage (Rent to Own)**	Request sent; “CHS will review it and pass it to the owner”. No money taken.
2	ADMIN	Admin dashboard → **Rent-to-Own Requests** tab	Review the buyer, then tap **Relay to the owner**	Buyer shown with ID and liveness verified. After relaying: the buyer is told it went to the owner.
3	OWNER B 08050000003	Notification “A Rent-to-Own request for your property” → **top of the Owner dashboard**	Tap **Approve this request**	Shows ₦400,000/month and “Ref RTO-xxxx” — **no phone number**. Agreement becomes active.
4	BUYER 1	Home → the Rent-to-Own link, or **/rent-to-own**	Open the active agreement	Ownership 0%. Button: “Pay this month's installment — ₦422,000”.
5	BUYER 1	same	Tap the pay button	Receipt reference RTO-…; ownership **33.33%**; wallet down ₦422,000.
6	OWNER B	Wallet / notifications	Look	“Installment received” — wallet up **₦382,000** immediately.
7	ADMIN	Platform Earnings	Look	A new **₦40,000** (₦22,000 buyer + ₦18,000 owner) for this payment.
8	BUYER 1	/rent-to-own	Pay a 2nd time, then a 3rd	Ownership 66.67%, then **100.00%**. After the 3rd: “You now own this property!”, agreement **completed**.
9	ADMIN / anyone	The studio's listing	Look	The property is marked **sold**. CHS earned ₦120,000 in all.

Step	Log in as	Where	Do this	You should see
10	BUYER 1	/rent-to-own	Try to pay again	Refused: no active agreement — it is already complete.

Script 2 — a long agreement: the Kawo duplex (two payments)

Step	Do this	You should see
1	BUYER 1 requests PROP-000833; ADMIN relays it; OWNER A (08120000001) approves	Agreement active, ownership 0%.
2	BUYER 1 pays once	Buyer pays **₦316,500**; owner receives **₦286,500**; ownership **0.833%**; CHS earns ₦30,000.
3	BUYER 1 pays again	Ownership **1.667%**; total paid ₦600,000. (You do not need to continue — 120 payments finish it.)

Script 3 — two buyers want the same house (the safeguard)

Step	Do this	You should see
1	BUYER 1 requests the Barnawa flat (PROP-000850); BUYER 2 (08050000006) also requests it; ADMIN relays both	Both requests reach OWNER A (admin sees “1 other request pending”). Asking twice as the same buyer says “You already have a Rent-to-Own request on this property”.
2	OWNER A approves BUYER 1	BUYER 1's agreement is active. **BUYER 2's request is declined automatically** and BUYER 2 is told it is no longer available (nothing was charged).
3	BUYER 2 tries to request the flat again	Refused: “This property already has an active Rent-to-Own agreement with another buyer.”
4	BUYER 1 pays once	Buyer pays **₦263,750**; owner receives **₦238,750**; ownership **1.389%**.

Script 4 — a big instalment: the GRA Phase 2 house

Step	Do this	You should see
1	BUYER 2 (08050000006) requests PROP-000851; ADMIN relays; OWNER B (08050000003) approves	Active agreement.
2	BUYER 2 pays once	Buyer pays **₦1,055,000**; owner receives **₦955,000**; ownership **1.190%**; CHS earns ₦100,000. Wallet falls from ₦8,395,000 to ₦7,340,000.

Tip: scripts 2, 3 and 4 leave real agreements behind. Re-run them only with a property you have not already used, or ask for the data to be reset.

5. The documents

What the platform produces and holds today

Document / record	Where it lives	What it contains
Terms & Conditions — term 22	Footer → Terms; each user accepted it	The rent-to-own rules above, in the terms both parties agreed to. (Version 3 — everyone re-accepts once.)
Rent-to-Own agreement record	/rent-to-own (buyer); property page and Owner dashboard (owner)	Property, price, instalment, ownership so far, total paid, status (requested → active → completed).
Payment receipts	Shown after each payment; reference **RTO-xxxxxxxx**	Instalment, the buyer's CHS commission, the total paid, the date.
Notifications	Each party's bell	Request, approval, every instalment (with the reference), completion, and decline notices.

Document / record	Where it lives	What it contains
Platform Earnings entries	Admin → Platform Earnings	Two entries per instalment: the buyer's 5.5% and the owner's 4.5%.
Audit trail	Admin → Audit Log	Who approved what, and when.

What the platform does not produce — for a real deal these must come from the parties' lawyers, and CHS can add a template to the platform if you wish:

- A signed **Rent-to-Own agreement** setting out the price, the instalments, what happens on a missed payment, and the owner's and buyer's duties.
- A **payment schedule** (the tables in section 2 are a good start).
- At completion, the **deed of assignment** and registration of the new owner's title (Certificate of Occupancy / Governor's Consent). The platform marks the property sold; it does not transfer the legal title.
- The owner's **title documents**, checked when the listing is verified. The four test listings are marked verified for testing and carry no real title files.

Sample payment schedule — Kawo duplex (first three and last payment):

Payment	Buyer pays	Owner receives	CHS earns	Total paid so far	Ownership
1	₦316,500	₦286,500	₦30,000	₦300,000	0.833%
2	₦316,500	₦286,500	₦30,000	₦600,000	1.667%
3	₦316,500	₦286,500	₦30,000	₦900,000	2.500%
…	…	…	…	…	…
120	₦316,500	₦286,500	₦30,000	₦36,000,000	**100.000% — sold**

6. What is not built yet — so it does not surprise you

These came from reading the code while preparing the tests. They are listed so you can decide what you want, not as faults you must work around.

- **No due dates and no missed-payment handling.** The buyer may pay several instalments back-to-back (useful for testing), and nothing reminds them or records a missed month. The statuses “defaulted” and “cancelled” exist but nothing sets them.
- **No way for an owner to decline a request** (only to approve), and no way to end an agreement early.
- **Instalments are paid to the owner immediately**, not held in escrow, and the listing's “minimum deposit” and “years” fields are shown but not enforced.
- **The pay screen always shows the regular instalment**; on a final payment smaller than usual the amount actually charged is the lower, correct one.
- **No agreement document is generated** (see section 5).

7. Quick reference — where things are

Who	To do this	Go here
Buyer	Ask to own a property	Property page → **Request Mortgage (Rent to Own)**
Owner	Approve a request	Notification → the **top of the Owner dashboard** → **Approve this request**
Buyer	See ownership and pay	**/rent-to-own** → **Pay this month's installment**
Owner	See the money arrive	Wallet and notifications (“Installment received”)
Admin	Relay or reject a request	**Rent-to-Own Requests** tab in the Admin dashboard
Admin	See what CHS earned	**Platform Earnings** tab (and notifications “Real Rent-to-Own installment received”)
