CHS Shortlet Demo Guide

CHS — Shortlet Demo Testing Guide

Real, working demo accounts and listing — already tested, end to end, before handing this to you.

Before you test — what I already proved works

I did not just build this and hand it over. I ran a real, complete booking myself, using these exact accounts, and confirmed with real numbers:

- The booking succeeds
- The guest's wallet is correctly debited the exact right amount
- The commission splits correctly between guest and host
- **The host can now genuinely see the guest's uploaded ID** — the specific gap fixed today

I then removed my own test booking afterward, so your real test starts completely clean.

The real demo accounts to use

Role	Phone	PIN	Login category to select
Host (property owner)	08050000009	123456	Owner
Guest (the one booking)	08050000010	123456	Guest

A real, ready listing to book

"Cozy 2-Bedroom Shortlet, Barnawa" — ₦40,000/night, already correctly priced and active.

Step-by-step — testing as the Guest

1. Log in with **08050000010**, PIN **123456**, selecting **Guest**.
2. From the homepage, search or browse to find **"Cozy 2-Bedroom Shortlet, Barnawa."**
3. Tap **"Book now."**
4. Choose real start and end dates (e.g., any two nights).
5. Enter your name, phone, and upload any real image as your ID (this is exactly the field that gets shown to the host).
6. Confirm and pay — this comes out of your real, existing wallet balance, no card needed for this test.

7. You should see a real, immediate confirmation.

Step-by-step — checking it as the Host

1. Log out, then log in with **08050000009**, PIN **123456**, selecting **Owner**.
2. Go to your dashboard — look for **“Shortlet & Venue Bookings.”**
3. You should see the real booking you just made as the guest, including:
   - The guest’s name and phone
   - **A real, working “View guest’s uploaded ID” link** — tap it and confirm the image you uploaded actually opens

What to check on the Admin side (optional, but recommended)

1. Log in as Admin.
2. Check the wallet/transaction record for both accounts — the guest’s balance should have dropped by exactly the booking amount, and a real commission record should exist.

If anything doesn’t match this exactly

Tell me precisely which step didn’t behave as described here, and I’ll check the real, live data immediately — the same way I did for every other issue in this round.

New since this guide was written (October 2026)

The booking flow in this guide still applies. These things are new, so you will see them when you test:

- **Finding a place for your dates.** On the home page, choose check-in and check-out dates and CHS shows only the hotels, lodges and shortlets that are free on those dates. You can also filter by accessibility (for example step-free access). A host ticks the accessibility features when listing, and they must be true.
- **Booking several rooms in a hotel or lodge.** Choose how many rooms and how many adults and children. CHS requests each room as its own booking, linked together. The host confirms the dates, and when it is time to pay you can use "Pay all N rooms at once" instead of paying one room at a time. Your wallet must hold the total. Under Extras you can ask for breakfast, half or full board, an extra bed, airport pickup, laundry, early check-in, late check-out, cleaning or a baby cot; the host answers with a price and you pay through CHS.
- **Weekly and monthly discounts.** A host can offer a weekly discount (7 nights or more) and a monthly discount (28 nights or more), up to 50%, from the host page under Stay offers. The guest sees the discount as its own line in the price, and CHS's fees are worked out on the discounted price.
- **Group and corporate enquiries.** On a hotel, lodge or shortlet page a guest can send a group enquiry (names, number of guests and rooms, dates, purpose). It goes to the host through CHS. Phone numbers, emails and links are refused, and five enquiries a day is the limit. An enquiry is not a booking; the booking itself is made and paid on CHS.
- **Ratings.** A property page shows a summary of its ratings. A guest can rate only after the stay has started, and a rating cannot contain contact details.

For event centres, advance payments, documents, capacity and seating, see section 19C of the Users Guide.
