CHS Test Accounts — with the role to log in as

How to log in. On the login page you must choose a role **before** you enter the phone number and PIN. If the role you choose is not one that account holds, the app refuses with a message naming the role it does hold. So for each account below, pick exactly the role in the **LOG IN AS** column. The PIN for every account is **123456**. Identity verification is already done. Never use these for real money or real people.

Role names are as shown on the login screen: Buyer, Guest, Tenant, Property Owner, Host, Agent, Property Manager, Admin, Artisan, Vendor / Service Provider. Some accounts hold two roles (for example Property Owner and Host); either works, and the notes say which fits each test. Wallet balances change as you test; check the wallet before each money step.

Before you test

1. Keep the master switch for paid plans (Admin, Hotel Controls, Hospitality plans and pilot) OFF for the first pass, so every tool is open.
2. Check wallet balances first and write them down.
3. Hotel check-in works only on the booking's start date, so book for today.
4. If a login says "isn't registered as X", read the message: it names the role to pick instead.
